

HOSPITAL VIRTUAL DEMENTIA TOUR®

VIRTUAL DEMENTIA TOUR®
YOUR WINDOW INTO THEIR WORLD

THE HOSPITAL VDT®

In addition to being sick or injured, dementia patients have unique challenges in a hospital setting. Hospital Virtual Dementia Tour® simulates what a visit to the hospital feels like for a person with dementia. In addition to

Participants translate their own experiences into practices that ensure a better outcome for patients, care staff, and other personnel.

EVIDENCE-BASED DEMENTIA TRAINING FOR HOSPITALS

DEEPER UNDERSTANDING OF THE DEMENTIA PATIENT'S EXPERIENCE:

- Informs empathic, person-centered care
- Increases patient comfort and compliance
- Reduces stressful interactions with patients
- Decreases use of psychotropic medications
- Improves staff efficiency and satisfaction
- Shortens length of stay and consequent secondary issues
- Improves patient, family and staff satisfaction
- Results in significant cost savings to the hospital
